Projects

Numo Erp – Enterprise Resource Planning System with Integrated SaaS Learning Platform

Role: Developed a scalable, type-safe front-end for an ERP system managing HR, employees, and sales, with an integrated SaaS application for online learning and training delivery.

Key Contributions:

- Engineered a responsive SPA using Vue 3 + Inertia.js, seamlessly connected to a Laravel backend for real-time data operations.
- Built HR, employee, and sales management modules with optimized workflows and intuitive dashboards.
- Integrated a SaaS-based learning platform within the ERP, enabling course creation, enrollment, and progress tracking.
- Designed and implemented a custom design system using Tailwind CSS 4, shadcn, and Reka UI for consistent, reusable, and accessible UI patterns across all modules.
- Implemented full multilingual support using Laravel i18n and Vue I18n, including Arabic with complete RTL adjustments.
- Leveraged TanStack Query for efficient data fetching, caching, and state synchronization across modules.
- Utilized Ziggy for server-driven routing, ensuring route consistency between front-end and backend.

Tech Stack: Vue 3, TypeScript, Inertia.js, Vue I18n, Laravel i18n, TanStack Query, TanStack Table, Axios, Ziggy (routes), shadcn, Reka UI, Tailwind CSS 4

Bioven Pharma – Pharmaceutical Company Website

Role: Designed and developed Bioven Pharma's corporate website to align with the company's brand identity.

Key Contributions:

- Customized Elementor templates to create fully responsive, device-friendly pages.
- Enhanced user experience for seamless navigation through products and services.
- Implemented multilingual support via GTranslate to reach international audiences.
- Configured essential SEO settings to improve search engine visibility

Tech Stack: (Wordpress ,Elementor Pro , Gtranslate)

Live: <https://bioven-pharma.com/>

Sanksa – Construction Company Website

Role Designed and developed Sanksa's corporate website to showcase construction

Key Contributions :

- Designed and organized service and project sections for intuitive navigation and strong visual presentation.
- Enhanced site performance and implemented on-page SEO strategies to boost visibility in construction-focused searches.
- Delivered a professional, mobile-friendly experience optimized for all screen sizes.

- Developed a fully responsive, brand-consistent website showcasing the company's construction expertise and portfolio.

Tech Stack: Wordpress

Live: <https://sanksa.com/>

Idea-consult Ai-Powered Market Intelligence Platform

Role : Developed and customized a web platform enabling businesses to generate tailored market reports and comprehensive business plans with exceptional speed and accuracy.

Key Contributions :

- Built a responsive, user-friendly interface to showcase the platform's AI-driven market research capabilities.
- Integrated dynamic tools for creating customized market reports and business plans in minutes.
- Optimized site performance and navigation to ensure a seamless experience for business users.
- Applied brand-aligned design and layout for a professional, trustworthy online presence.

Tech Stack : HTML5, CSS3, Bootstrap 5, JavaScript, WordPress, PHP

Live : <https://ideaconsult.biz/>

Tasme3 - Online Quran Memorization Platform

Role : Developed a responsive web platform dedicated to helping individuals memorize and master the Holy Quran through interactive tools and structured resources

Key Contributions :

- Designed an intuitive, accessible interface optimized for learners of all ages.
- Integrated interactive features to support memorization, revision, and progress tracking.
- Applied responsive design principles for seamless use across desktop and mobile devices.
- Ensured performance optimization and smooth API integration for reliable content delivery.

Tech Stack: (Html5, Css3, Bootsrab5, JavaScript, jQuery, Restful Apies)

Live: <https://tasmi3.app/>

TMS – Admin Dashboard for E-sim Management

Role: Developed a responsive web-based admin dashboard enabling full control over eSIM cards, including plan management, administrative actions, balance recharging, bundle management, and usage history tracking.

Key Contributions :

- Interactive interface for managing eSIM cards and updating subscription plans.
- Seamless integration with RESTful APIs to retrieve, update, and synchronize data in real-time.
- Optimized front-end performance with clean, modular React components and Bootstrap 5 styling.
- User-friendly design ensuring efficient navigation and workflow for administrators

Tech Stack: React js , Bootstrap 5 , JavaScript , Jquery

Foodies
